What is NutriHydro: A fertilizer blending company that manufactures water soluble fertilizers used in hydroponics, aeroponics, drip irrigation, fertigation, sprinklers, and foliar spray. The greenhouse grade plant nutrients they produce are specifically used in the cultivation of lettuce, leafy greens and herbs, solanaceous crops, peppers, melons, and berries. In the Philippines, NutriHydro is known to grow the healthiest, heaviest, and largest lettuce in the country. NutriHydro is also known as NH.

PRODUCT CATEGORIES OF NUTRIHYDRO

1. **Concentrate Nutrient Solution:** NutriHydro's Concentrate Nutrient Solution is a greenhouse grade liquid concentrate nutrient that is completely water soluble. It is used in hydroponics, aeroponics, drip irrigation, and sprinklers. The concentrate form means convenience to a user because all you have to do is dilute equal parts of the concentrate in water until you reach the desired TDS level. TDS stands for Total Dissolved Solids. Each crop has different TDS requirements to thrive, grow, flower, and fruit. Concentrate Nutrient Solution products are:

- 1.1. Lettuce Concentrate Formula
- 1.2. Leafy Concentrate Formula
- 1.3. Fruit Bearing Concentrate Formula

2. **Commercial Farm Formula (CFF):** NutriHydro's CFF is a greenhouse grade dry form nutrient that is completely water soluble. It is used in hydroponics, aeroponics, drip irrigation, sprinklers, and foliar sprays. The CFF form means economical and customizability to a user. The user will be able to adjust how much nitrogen, CFF, and magnesium sulfate is used all throughout the lifecycle of a crop. Crops, in its different phases of growth require varying levels of nitrogen, phosphorus, and potassium and using CFF, growers are able to adjust such levels.

Growers are also able to make stock solutions. Stock solution are concentrate made from the CFF itself. When using stock solutions, it is easier to apply and use compared to CFF. CFF products are:

- 2.1. Lettuce CFF
- 2.2. Leafy CFF
- 2.3. Fruit Bearing CFF
- 2.4. Melons CFF
- 2.5. Peppers CFF
- 2.6. Berries CFF

3. **Rapid Nutrient intervention:** are products in concentrate form applied as foliar spray and or root feeding. Rapid Nutrient products are:

- 3.1. **Iron Chelate:** a liquid concentrate form that contains Iron Chelate in DTPA form and a complete host of micronutrients. This product helps prevent iron deficiencies.
- 3.2. **Calcium Chelate:** a nutrient concentrate that contains Calcium and micronutrients. This product helps prevent tip burns, gives foliage an extra crisp, and strengthen fruit shells that improve shelf life.
- 3.3. **Growth Nutrient:** a nitrogen rich concentrate with micronutrients that helps boost foliage and overall growth.

4. pH Control: Used to control pH of nutrient rich water. When the pH is correct, crops are able to uptake the most nutrients leading to their full potential, fast growing, large, healthy, and very heavy lettuce. When crops are grown in the incorrect pH, they do not get as much nutrients leading to crops that never reach their full potential. When crops are grown in the incorrect pH, they are small, unhealthy, light, and not particularly healthy to look at so much more to consume. NutriHydro's pH products are:
 - 4.1. pH Up: Potassium based pH control that adds alkalinity to nutrient rich water.
 - 4.2. pH Down Seedling Starter: nitrogen based acid containing nutrients that aid in root growth.
 - 4.3. pH Down Nitrogen Based: nitrogen based acid that is specifically formulated for lettuce, leafy greens, and herbs.
 - 4.4. pH Down Phosphorus Based: commonly used pH Down control. NutriHydro's blend is intended for use in fruit bearing crops.
5. Biostimulants: Foliar sprayed biostimulant products rich with organic nutrients. When used as combination, these biostimulant products promote growth and adds crops to edible foliage. It also promotes bloom and improves shelf life in fruit bearing crops. NutriHydro's biostimulants cannot be applied as root feeding. Biostimulant products are:
 - 5.1. Bio CalMag: a biostimulant fortified with Calcium and Magnesium. The calcium in this nutrient prevents tip burns, the magnesium provides for a healthy green color, and biostimulant which improves the overall health of the crop.
 - 5.2. Bio Grow: a biostimulant made from amino acids and micronutrients that promotes foliage and overall growth.
 - 5.3. Bio Bloom: a biostimulant that is used to promote the bloom, flower, and fruiting of crops.
6. Seeds: NutriHydro sells seeds from 3 brands. Enza Zaden (EZ), Rijk Zwaan (RZ), and its own brand NutriHydro (NH). It sells the complete lettuce varieties namely leaf lettuce, butterhead, oakleaf, and romaines. It also sells subvarieties of leaf lettuce such as Batavia, Frizzy, and Crystal lettuce. Most of the seeds for sale are pelleted while some are bare seeds. Seed products are:

Enza Zaden (EZ) Seeds
Rijk Zwaan (RZ) Seeds
NutriHydro (NH) Seeds

PRICE LIST OF NUTRIHYDRO

1. Concentrate Nutrient Solution: NH Lettuce Nutrient Solution, NH Leafy Nutrient Solution, NH Fruit Bearing Solution
 - 1.1. 100 mL, Php 150
 - 1.2. 500 mL, Php 300
 - 1.3. 1 Liter, Php 550
 - 1.4. 4 Liters, Php 2,000
 - 1.5. 20 Liters, Php 9,500 (available as preorder only)
2. Commercial Farm Formula: NH Lettuce CFF, NH Leafy CFF, NH Fruit Bearing CFF
 - 2.1. 250 Grams, Php 205
 - 2.2. 500 Grams, Php 430
 - 2.3. 1 Kilogram, Php 600
 - 2.4. 2 Kilograms, Php 1,150
 - 2.5. 20 Kilograms, Php 11,200 (available as preorder only)

3. Commercial Farm Formula: CFF, NH Melons CFF, NH Peppers CFF, NH Berries CFF
 - 3.1. 250 Grams, Php 255
 - 3.2. 500 Grams, Php 500
 - 3.3. 1 Kilogram, Php 850
 - 3.4. 2 Kilograms, Php 1,500
 - 3.5. 20 Kilograms, Php 14,500 (available as preorder only)
4. pH Control: pH Up, pH Down Phosphorus Based, pH Down Nitrogen Based
 - 4.1. 250 mL, Php 135
 - 4.2. 500 mL, Php 205
 - 4.3. 4 Liters, Php 1,500
5. pH Control: pH Down Seedling Starter
 - 5.1. 250 mL, Php 145
 - 5.2. 500 mL, Php 225
 - 5.3. 4 Liters, Php 1,600
6. Rapid Nutrient Intervention: NH Iron Chelate, NH Calcium Chelate, NH Growth Nutrient
 - 6.1. 100 mL, Php 120
 - 6.2. 500 mL, Php 255
 - 6.3. 1 Liter, Php 485
 - 6.4. 4 Liters, Php 1,850
 - 6.5. 20 Liters, Php 8,750 (available as preorder only)
7. Biostimulants: NH Bio CalMag, NH Bio Grow, NH Bio Bloom
 - 7.1. 500 mL, Php 200
 - 7.2. 1 Liter, Php 390
 - 7.3. 4 Liters, Php 1,490

SHOP & BUSINESS DETAILS

1. Where to buy NutriHydro Products:
 - 1.1. Shop Location: Located at 146 Road 20 corner Parnas Street, Barangay Baha Toro, Project 8, 1106, Quezon City, Philippines. Shop Hours: 9:00 am to 5:00 pm Mondays to Fridays. 9:00 am to 12:00 noon Saturdays.
 - 1.2. Lazada e-commerce Shop: <https://bit.ly/3asMYXN>
 - 1.3. Shopee e-commerce Shop: <https://bit.ly/3nRjX6Z>
 - 1.4. NutriHydro e-commerce Shop: <https://bit.ly/434MoY6>
2. Warranties and guarantees: NutriHydro pledges warranties and guarantees, returns and exchanges are allowed, no questions asked. Shipping and courier fees are covered by NutriHydro only when it is at fault.
3. Shipping options: A number of shipping options are available which will have to be coordinated with NutriHydro either by call, email, or through chat app on our website or our Facebook page. Orders must be paid in advance before sending out. Our usual shipping options are:
 - 3.1. Lalamove, Grab, Toktok, and other similar same-day courier delivery.
 - 3.2. LBC and Johnnny Air
 - 3.3. Lazada and Shopee delivery platforms

CULTIVATION QUESTIONS, LEARN HYDROPONICS, AND VIDEOS TO WATCH TO LEARN HYDROPONICS

1. How to grow lettuce using NutriHydro: <https://bit.ly/3nBZvB2>
2. How to grow Arugula: <https://bit.ly/3KmABOj>
3. Videos to learn hydroponics: Marvin Baeza's Youtube channel
<https://www.youtube.com/@KataniMarvin>

4. Who can teach hydroponics?: Marvin Baeza, here is his Facebook page <https://www.youtube.com/@KataniMarvin>
5. Who is Marvin Baeza?: Marvin Baeza is a person who teaches newbies and beginners to become enthusiasts. Marvin Baeza performs mentoring service to those who would like to become professional growers. He's had a string of projects in building greenhouses and grow systems all over the Philippines.
